

REQUEST FOR QUOTATION

Website Design & Development

HVAC Industry Client — South India

ISSUED BY

Strux Digital

DOCUMENT TYPE

Request for Quotation

QUOTE REQUIRED BY

This document is issued by Strux Digital on behalf of a client. Client identity is confidential.
Please provide a detailed, line-item quotation covering all phases and deliverables listed.

Project Overview

Strux Digital is issuing this Request for Quotation on behalf of a client in the HVAC industry based in South India. The client is an established, multi-city operation requiring a full website design and development engagement. Client identity is confidential at this stage and will be disclosed upon engagement.

The project requires a two-part website build: a custom-designed main website and a WooCommerce-powered ecommerce store. Both parts must appear as a single seamless experience to the end visitor. The workflow is design-first — all UI frames are to be finalised in Figma before any development begins.

TOTAL PAGES DESIGNED 32 Pages + templates	TOTAL LIVE PAGES ~77 Including all products	ECOMMERCE PRODUCTS 30 Daikin product listings
--	--	--

WHAT WE NEED FROM YOU

A detailed, line-item quotation broken down by phase (Figma design, main website development, ecommerce development, features) and by individual deliverable where possible. We require separate line items for design and development. Do not combine them into a single number. Provide your best estimate with clear assumptions. If any scope item requires clarification before quoting, flag it explicitly.

IMPORTANT: All client-specific names, brand names, and project references in this document have been masked. Do not attempt to identify the client. Treat this as a confidential brief from Strux Digital. Any communication about this project must go through Strux Digital only.

PHASE 1

Figma UI Design

Design-first workflow

All pages and templates listed in this phase must be fully designed in Figma before any development begins. This is a strict workflow requirement. Deliverables include desktop and mobile frames for every page. Design must follow a consistent design system: colour palette, typography scale, spacing system, and component library. Client review and sign-off happens at the Figma stage before development.

MAIN WEBSITE — FIGMA FRAMES

#	Page / Screen	Desktop Frame	Mobile Frame	Notes
01	Home	1	1	Includes hero, stat bar, buyer-path split, new launches section
02	Contact	1	1	Inquiry form with dropdown intent selector, branch table
03	Solutions — Commercial HVAC	1	1	Sector page layout
04	Solutions — IT Services HVAC	1	1	Sector page layout
05	Solutions — Industrial & Pharma	1	1	Sector page layout
06	Solutions — Healthcare HVAC	1	1	Sector page layout
07	Solutions — Hospitality & Retail	1	1	Sector page layout
08	Solutions — Residential	1	1	Includes AC Tonnage Calculator widget
09	Services — How We Work	1	1	Process timeline / step layout
10	Services — AMC	1	1	Three-tier plan layout with inclusions table
11	Services — Service Request Form	1	1	Customer-facing form page
12	Blog Index	1	1	Article grid with category filter
13	Blog Post Template	1	1	Article layout, sidebar CTA, related posts
14	Blog — Sustainability Category	1	1	Category landing page
15	About — Company	1	1	Story, stat bar, values
16	About — Our Team	1	1	Leadership grid, team structure
17	About — Our Work (Case Studies)	1	1	3–4 case study vertical scroll
18	About — Awards & Recognition	1	1	Award grid with captions
19	About — Careers	1	1	Open roles listing, application CTA
20	404 Error Page	1	1	On-brand error page

ECOMMERCE STORE — FIGMA FRAMES

#	Page / Template	Desktop Frame	Mobile Frame	Notes
T1	Shop Index	1	1	Product grid, category filters, sort
T2	Product Category Page	1	1	One template, powers all ~10 categories
T3	Individual Product Page	1	1	One template, powers all 30 products
T4	Cart	1	1	Standard cart view
T5	Checkout	1	1	Address, payment, order summary
T6	Order Confirmation	1	1	Post-purchase confirmation
T7	My Account	1	1	Login, order history, profile
T8	Search Results	1	1	Filtered product grid

Total Figma frames: 28 pages x 2 (desktop + mobile) = 56 frames minimum. A component library and design system (colour tokens, typography scale, spacing, buttons, form elements, cards) must be delivered as part of the Figma file.

QUOTE INPUT — PHASE 1

Deliverable	Scope	Your Quote (INR)	Timeline (Days)	Assumptions / Notes
Main website Figma frames (20 pages)	Desktop + mobile for all 20 pages			
Ecommerce Figma frames (8 templates)	Desktop + mobile for all 8 templates			
Design system & component library	Colours, type, spacing, components			
Revision rounds included	State how many rounds are included			
PHASE 1 TOTAL				

PHASE 2

Main Website Development

Custom build — 22 pages

Development begins only after Figma frames are approved. The main website is a custom-built site — not a theme or page builder template. It must be pixel-accurate to the approved Figma designs. Responsive across desktop, tablet, and mobile. Fast load times. SEO-ready markup on all pages (clean HTML structure, schema markup, meta tag support).

PRIMARY PAGES

- 01

Home

/

Authority homepage. Hero section, stat bar, buyer-path split (commercial vs. residential), New Launches section (dynamic, pulls from WooCommerce featured products), client reference section, services overview, CTA block. AI chatbot widget embedded.

PHASE 2
- 02

Contact

/contact

Inquiry form with intent dropdown. Branch offices table. Form routes to different email recipients based on selected intent.

PHASE 2

SOLUTIONS — 6 PAGES

- 03

Commercial HVAC

/solutions/commercial

Sector solution page. Buyer context, systems overview, client references, consultation CTA.

PHASE 2
- 04

IT Services HVAC

/solutions/it-services

Dedicated IT sector page. Server rooms, data centres, precision cooling requirements.

PHASE 2
- 05

Industrial & Pharma HVAC

/solutions/industrial-pharma

Pharma clean rooms, cold rooms, manufacturing. Compliance context, system types.

PHASE 2
- 06

Healthcare HVAC

/solutions/healthcare

Hospitals, OT rooms, diagnostic centers. Infection control, precision air handling.

PHASE 2
- 07

Hospitality & Retail

/solutions/hospitality-retail

Hotels, malls, large F&B.; Scale, finish, energy efficiency.

PHASE 2
- 08

Residential

/solutions/residential

Luxury villas and apartments. Includes embedded AC Tonnage Calculator widget (see Phase 4 — Features). CTA links to ecommerce store and consultation form.

PHASE 2

SERVICES — 3 PAGES

- 09

How We Work

/services/how-we-work

End-to-end process page. Site assessment through commissioning and handover.

PHASE 2

10 AMC

PHASE 2

/services/amc

Three-tier AMC plan page. Plan comparison table, inclusions, SLAs, quote-request CTA.

11 Service Request Form

PHASE 2

/services/service-request

Customer-facing service complaint and request form. Must accept submissions and route to email.

BLOG — 3 PAGES + CMS**12 Blog Index**

PHASE 2

/blog

Article grid. Category filter: Sustainability, Maintenance & Tips, Energy Efficiency, Buying Guides, Project Spotlights. Dynamic — pulls from CMS.

13 Blog Post Template

PHASE 2

/blog/[post-slug]

Single article layout. Author, date, body, related posts, CTA. SEO: schema markup, clean heading structure. Powered by CMS.

14 Sustainability Category Page

PHASE 2

/blog/category/sustainability

Category landing page. Lists all articles in the Sustainability category.

ABOUT — 5 PAGES**15 About**

PHASE 2

/about

Company story, 25-year timeline, credentials, stat bar.

16 Our Team

PHASE 2

/about/team

Leadership profiles with photos and roles. Team structure section.

17 Our Work — Case Studies

PHASE 2

/about/our-work

Three to four case studies in a vertical scroll. Each study: client sector, project scope, challenge, solution, outcome. Recently Completed Projects section at the top.

18 Awards & Recognition

PHASE 2

/about/awards

Award grid with name, awarding body, and year per award.

19 Careers — Hire Us

PHASE 2

/about/careers

Open roles listing by department. Application form or mailto link.

UTILITY**20 404 Error Page**

PHASE 2

/404

On-brand error page with navigation back to key sections.

QUOTE INPUT — PHASE 2

Deliverable	Pages	Your Quote (INR)	Timeline (Days)	Assumptions / Notes
Primary pages (Home, Contact)	2			
Solutions pages	6			
Services pages	3			
Blog pages + CMS integration	3 + CMS			State which CMS
About pages	5			
404 page	1			
Responsive implementation (all pages)	All			Desktop, tablet, mobile
SEO markup (all pages)	All			Schema, meta tags, clean HTML
Forms & email routing	3 forms			Contact, service request, careers
PHASE 2 TOTAL				

PHASE 3

Ecommerce Store Development

WooCommerce —
30 products

The ecommerce store runs on WooCommerce. It must visually match the main website — same header, navigation, colour system, and typography. The store is template-driven: 8 templates are designed in Figma (Phase 1) and built here, then used to power approximately 10 product category pages and 30 individual product pages. Product content (names, descriptions, specs, images, pricing, variants) will be provided by Strux Digital. The vendor is responsible for setting up the WooCommerce environment and populating all 30 products.

TEMPLATES TO BUILD — 8

T1	Shop Index <i>/store</i> Main store landing page. Product grid, category filters, sort options. Entry point from main website.	PHASE 3
T2	Product Category Page <i>/store/category/[name]</i> One template powers ~10 category pages. Category intro, filtered product grid.	PHASE 3
T3	Individual Product Page <i>/store/product/[name]</i> One template powers all 30 product pages. Images, specs, variant selector (tonnage, star rating), price, add-to-cart.	PHASE 3
T4	Cart <i>/cart</i> Product summary, quantity adjustment, subtotal, proceed to checkout.	PHASE 3
T5	Checkout <i>/checkout</i> Delivery address, payment options, order summary. No default WooCommerce styling.	PHASE 3
T6	Order Confirmation <i>/checkout/order-received</i> Post-purchase page. Order summary, next steps, contact details.	PHASE 3
T7	My Account <i>/my-account</i> Customer portal. Login, order history, saved addresses, account details.	PHASE 3
T8	Search Results <i>/search</i> Product search output with filtered grid.	PHASE 3

PRODUCT CATEGORIES — ~10 PAGES

• Split ACs — Non-Inverter	• Split ACs — Inverter
• Cassette ACs	• Ductable ACs
• Floor Stand ACs	• VRV Systems
• Chillers	• Air Handling Units
• Ventilation Systems	• Air Purifiers

Exact category list to be confirmed. All category pages are powered by Template T2.

PRODUCT POPULATION — 30 PRODUCTS

The vendor is required to populate all 30 product listings in WooCommerce using content provided by Strux Digital. Each product requires: model name, description, key specifications, 2–3 product images, variant options (tonnage and star rating where applicable), and pricing. Content will be delivered in a structured spreadsheet. Please quote separately for product population work.

QUOTE INPUT — PHASE 3

Deliverable	Scope	Your Quote (INR)	Timeline (Days)	Assumptions / Notes
WooCommerce setup & configuration	Payment gateway, shipping, tax			
8 custom WooCommerce templates	Pixel-accurate to Figma			
~10 category pages	Powered by T2 template			
30 individual product pages	Powered by T3 template			
Product population (30 products)	From Strux Digital spreadsheet			
Variant setup (tonnage, star rating)	Per product where applicable			
Payment gateway integration	State which gateway(s)			
Main site — store visual integration	Matching header, nav, colours			
PHASE 3 TOTAL				

PHASE 4

Site Features — Functional Components

3 features

These are functional components that are not standalone pages. Each requires separate development scope. Quote each feature individually.

FEATURE 1 — AI KNOWLEDGE BASE CHATBOT

Scope Item	Requirement	Vendor Notes
Knowledge base ingestion	Structured internal documents (PDFs, Word files, FAQs) ingested into the chatbot system. Content provided by Strux Digital.	
Chatbot widget	Persistent floating chat icon across all pages — main website and ecommerce store. Opens a chat panel.	
Knowledge base boundaries	Chatbot must respond ONLY from the provided knowledge base. It must not search the web or generate responses outside the provided knowledge base.	
Response accuracy	No hallucination. If the answer is not in the knowledge base, the bot must say so and direct the user to contact the company or visit the website.	
Content categories	Products, AMC plans, service procedures, sector FAQs, company information, installation process.	
Knowledge base updates	Mechanism for client to update the knowledge base as new documents are added — without developer involvement where possible.	
Platform / stack	State your recommended platform (e.g. custom RAG build, Botpress, Tidio + custom KB, other).	

Deliverable	Your Quote (INR)	Timeline (Days)	Platform Used	Ongoing Cost (Month)
AI Chatbot — full implementation				

FEATURE 2 — NEW LAUNCHES SECTION (HOMEPAGE)

A dynamic section on the Homepage that displays 3–4 featured/new product cards. Cards pull from WooCommerce featured product tags — client updates the section by tagging products in WooCommerce, no developer needed. Each card links to the relevant product page in the store.

Deliverable	Your Quote (INR)	Timeline (Days)	Assumptions / Notes
New Launches dynamic section			

FEATURE 3 — AC TONNAGE CALCULATOR (RESIDENTIAL PAGE)

Scope Item	Requirement	Vendor Notes
Input fields	Room length x width (ft) OR total area (sq ft). Room type selector: bedroom, living room, office cabin, kitchen.	
Calculation logic	Standard HVAC tonnage formula with heat load adjustment by room type. Outputs recommended tonnage: 0.75T, 1T, 1.5T, 2T.	
Result display	Tonnage recommendation with a one-line explanation. Two CTAs below the result: (1) View matching products, (2) Request a quote.	
Optional lead capture	After the result, optional prompt: enter phone number to receive a personalised recommendation from an engineer. Quote this as an add-on.	

Placement	Embedded as a section within the Residential Solutions page. Not a standalone page.		
Deliverable	Your Quote (INR)	Timeline (Days)	Assumptions / Notes
Tonnage Calculator — core build			
Lead capture add-on (optional)			If quoted separately

SUMMARY

Full Project Quote Summary

Fill in all phases

Consolidate your phase totals here. This is the summary table Strux Digital will use to evaluate your quotation. All amounts in INR exclusive of GST. State GST applicability separately. Include your overall project timeline in calendar days.

Phase	Description	Quote (INR, ex-GST)	Timeline (Days)
Phase 1	Figma UI Design — all pages and templates		
Phase 2	Main Website Development — 22 pages		
Phase 3	Ecommerce Development — WooCommerce + 30 products		
Phase 4a	AI Knowledge Base Chatbot		
Phase 4b	New Launches Dynamic Section		
Phase 4c	AC Tonnage Calculator		
Phase 4c+	Tonnage Calculator — Lead Capture Add-on (optional)		
	GST (state %)		
TOTAL	Full project (excl. optional add-on)		

PROJECT TIMELINE

Phase	Start Condition	Your Estimate (Calendar Days)
1 Figma UI Design	After project kickoff and brief handover	
2 Main Website Development	After Figma frames approved by client	
3 Ecommerce Development	Can run parallel to Phase 2 after templates approved	
4 Features (AI bot, calculator, new launches)	Can run parallel to Phase 3	
QA, testing, and revisions	After all development complete	
Go-live	After sign-off	
TOTAL PROJECT DURATION		

TERMS **Quotation Terms & Submission**

- | | |
|-----------|---|
| 01 | Confidentiality
This document is confidential. Do not share it with any third party. Client identity must not be disclosed or speculated about. |
| 02 | Quote currency
All quotes in Indian Rupees (INR), exclusive of GST. State GST percentage separately. |
| 03 | Quote validity
State the number of days your quoted prices are valid for. |
| 04 | Revision rounds
Clearly state how many rounds of revisions are included in each phase. State your rate for additional revisions. |
| 05 | Payment terms
State your preferred payment milestone structure (e.g. 40% on kickoff, 30% on Figma approval, 30% on go-live). |
| 06 | Hosting & domain
State whether hosting setup is included or separate. State your recommended hosting stack. |
| 07 | Post-launch support
State what post-launch support is included and for how long. State your monthly retainer rate for ongoing support. |
| 08 | Assumptions
List all assumptions your quote is based on. Flag any scope items that need clarification before you commit to a price. |
| 09 | Submission
Return this document with all quote input tables filled in, plus any additional notes or proposals. Submit to Strux Digital only. |
-

This RFQ is issued by Strux Digital. All project communication must go through Strux Digital. Direct contact with the end client is not permitted at this stage. Quotation does not constitute a contract. A formal project agreement will follow upon vendor selection.
